**Vision** A school administrator is an educational leader who promotes the success of all students by facilitating the development, articulation, implementation, and stewardship of a vision of learning that is shared and supported by the school community.

**I am an educationist because...** I am passionate about learning. I have sincerity and commitment. I want to perpetuate a legacy of truthfulness and integrity. I have innate love for children . I encourage and appreciate diversity. I foster critical thinking and encourage creative work.

**In the coming years I see Indian Education...** There will be more creativity in education. The role of teachers will be to guide students in the areas where they need guidance as innovators. Computers will become an essential ingredient in the recipe for an effective school of the future. Technology will play a vital role . The education system of the future will undergo a transition from a heavy emphasis on teaching to a heavy emphasis on learning. Experts will create the courseware and the students will learn anytime or anywhere at a pace that is comfortable for them, learning about topics that they are interested in. In the future, teachers will transition from topic experts to a role in which they act more as guides and coaches.

**I am an epitome of Leadership...** I have great determination, with the willpower and patience to see things through. I am willing to take risks. I understand the importance of relationships, empower my staff and pupils and show great empathy. I am optimistic and resilient, remain calm in a crisis and energetic and positive at all times.

**Footprints/ legacy-(What I leave behind)** A team of innovative teachers, a high-tech school, and an environment where learning is an ongoing process.
